

Your Challenge = Our Motivation

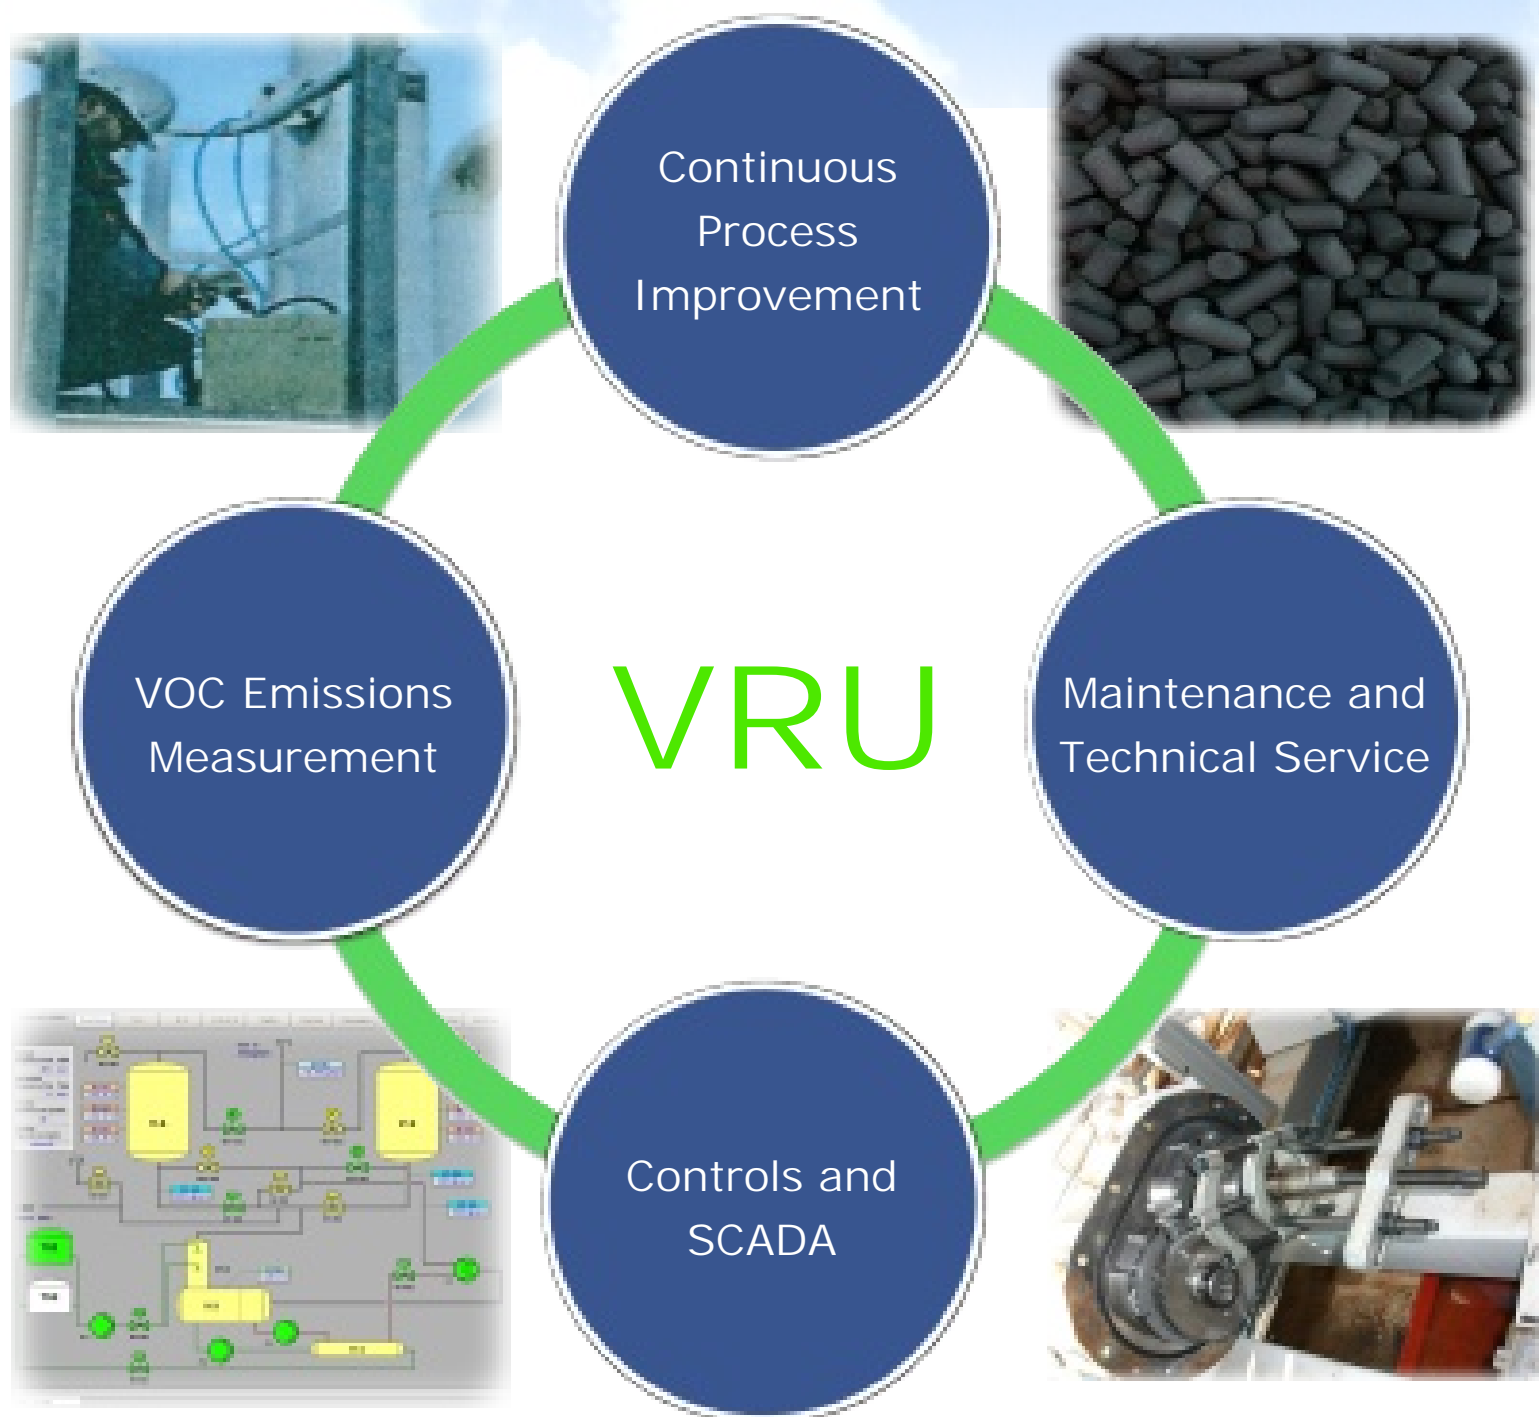

THE VAPOUR RECOVERY SPECIALIST

Our Principal Objectives:

Maintain the VOC emissions within the local regulations.

Optimize the process to deliver low VOC emissions.

Apply the most stringent safety rules and highest quality standards in everything we do.

Use our profound experience to maintain your VRU and to solve your vapour control problems.

For our customers we have a team of service and process engineers, which is very competent as well as working circumspectly and utilizing its many years of experience.

All around the VRU we offer 24/7 emergency call availability as well as a complete range of services for you to choose from:

Intervention on Demand

Scheduled Preventive Maintenance

Measurement and Analysis of VOC-Emissions According to Current Environmental Legislation

Process Optimization

Analysis and Expert Replacement of Active Carbon and its Disposal in an Environment-Friendly Manner

Erection of VRUs

Commissioning Support

Dismantling, Equipment Relocation, Retrofits and Recommissioning

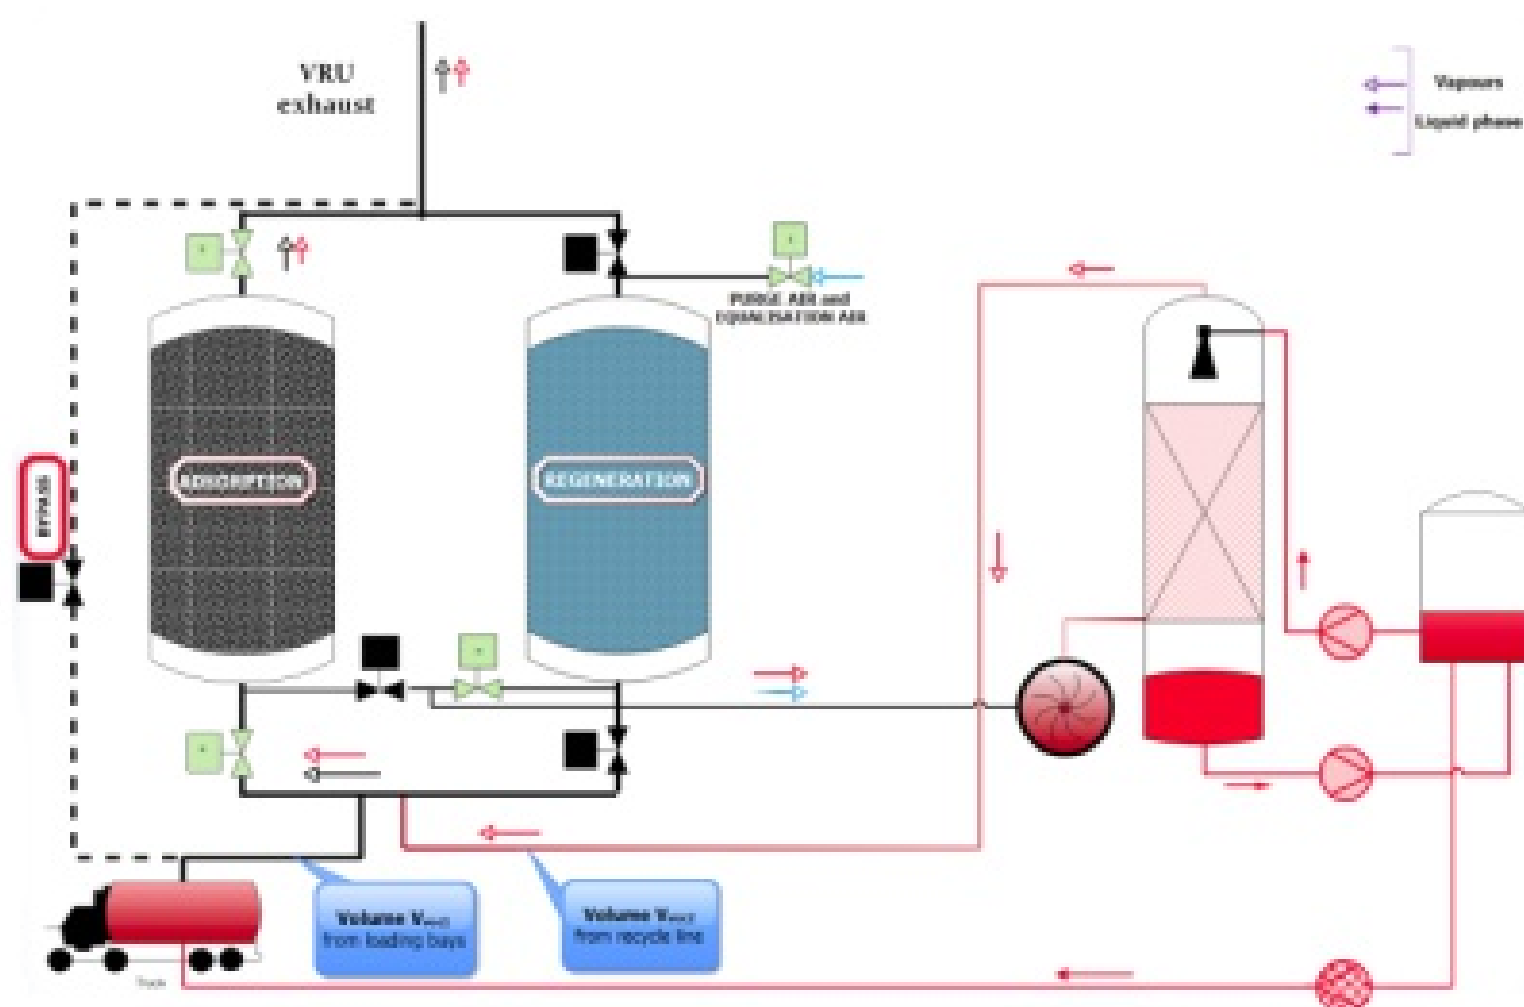

SCADA, Controls, and MCC Cabinets

Training of Operators

Moreover, we offer a custom-tailored maintenance contract adapted to your system and your needs, which may also include all parts and costs.

Your Satisfaction = Our Success
